- History:** Medieval Europe; Spread of Islam
- Recitation:** Science Fair Oral Presentation
- Art:** Art of Islam

Trait: Grit

This month, we will focus on the character trait of *Grit* and the “E” in Stratford’s HEART for *Educated Achievers*. A student with grit finishes what he/she begins, stays committed to goals despite setbacks, works even harder when feeling like quitting, and sticks with projects for more than a few weeks. We practice grit by making long-term goals and sticking to them!

Reminders

Finally, after months of hard work, we will have our 4th grade Science Fair on Wednesday, March 20th in the MPR from 1:45-2:30. Join us to learn more about our students’ projects and to view their presentation boards.

Parent-Teacher Conferences are Friday, March 15th. The focus of these conferences will be on your child’s readiness for 5th grade. We will discuss ways in which we can help your child succeed for the rest of his/her 4th grade year in order to be as prepared as possible for the increased academic and organizational demands of 5th grade.
